Flexible working hours, adaptable to CET or EST.
Working remotely from Europe (Serbia).

## Knowledge and skills

**FE**: react, redux, typescript
**NodeJS**: nextjs, express, socket-io, mysql
DB: MySQL, GraphQL
PHP: API creation.
CMS: Contentful
Other:  Tailwind, SFMC (basic), Optimizely
Technical: JIRA, SAFe training, Git,

## Work Experience

 FE Web Developer (2021 – current)

- Working on ashleymadison.com via outsource company
- Migrated all landing pages from PHP to **React** and **Next.js**, implementing a CMS in **Contentful,** loaded via GraphQL for dynamic content management.
- Building and optimizing the main application with **React**, **Redux**, and Saga.
- Creating and managing marketing emails in Salesforce Marketing Cloud (**SFMC**), ensuring dynamic and responsive email templates.
- Implementing and managing A/B tests and experiments in **Optimizely**

Freelance Web Developer (2010 – 2021)

- Over ten years of experience as a freelance web developer.
- Skilled in both frontend and backend development.
- Transitioned from PHP to Node.js for backend development since 2018.

Programming tutor for groups of 20+ students - CodeAcademy  2019-2021

Programming tutor for groups of 20+ students - IT Bootcamp  2018-2019

Programming Tutor (2000 – 2010)

- Privately tutored students in programming.
- Successfully taught over **200 students annually**.
- Developed customized lesson plans to meet **individual student** needs and effectively managing and teaching large **groups of up to 30 students**.

## Standalone web projects:

- Web-shops: ekozmetika.rs, chairs.rs, goldenrose.bg,
- Web-sites: bupti.org, furnix.rs, ivbcosmetics.com, konferencijabupti.com, metalnestalaze.rs, tradeexpress.co.rs, olepaikkonen.com
- HTML games: shortwhist,  wordzap, crickler, enigmadevice, wired

## Hobbies and interests

- When it comes to **programming in my own free time** I'm developing the online multiplayer card game: shortwhist.com
- For **BE, i finished my own api framework** apiJX (https://github.com/bojanpejkovic/apijx). This framework is developed to enable the user to obtain automatically all the API paths (routes) solely with MySQL database completed. Paths contain, search options, pagination, access levels by user role...
- Took part in a **js13k competition** with a game named "Wired" (https://github.com/bojanpejkovic/wired).
- I'm a passionate chess player and that inspired me to make a browser chess game with video chat, using webRTC (not online).

## Education

- College: The Faculty of Organizational Sciences (FOS) – Information systems and technologies .
- High school: Electrotech School  »Nikola Tesla« - IT profile
